

Camp Called Aid to Conservation

A camp is the best kind of workshop for conservation education. Fred Schmeeckle, professor of conservation at Wisconsin State college, Stevens Point, Wednesday told the Wisconsin section, American Camping association, at Hubbard park lodge, Shorewood. More than 100 persons attended.

"Conservation should not be a painful subject or study," Schmeeckle said. "It should be taught as a way of living, a way that makes use of natural resources without making waste of them."

In considering resources of soil, water, forests and other vegetative growth and wild life, students of conservation should be made aware of the "balance between man and the land," he said.

Arthur W. Jorgensen, Madison, outlined materials and aids available to groups and individuals interested in conservation projects. He is supervisor of education for the state department of conservation.

It was announced that a spring institute of the Wisconsin section would be held May 16 to 18 at Lake Geneva.

The ground hog prediction is for an early spring this year but, nevertheless, Mrs. Edward F. Cantwell, 4470 N. Murray av., Shorewood; Fred J. Schmeeckle (center), professor of conservation at Wisconsin State college, Stevens Point, and Ray E. Bassett, 2508 N. Stowell av., checked on the weather Wednesday at a meeting of the Wisconsin section of the American Camping association. Mrs. Cantwell is public relations chairman of the section. Prof. Schmeeckle spoke at the meeting at Hubbard park lodge. Bassett is president of the section.
